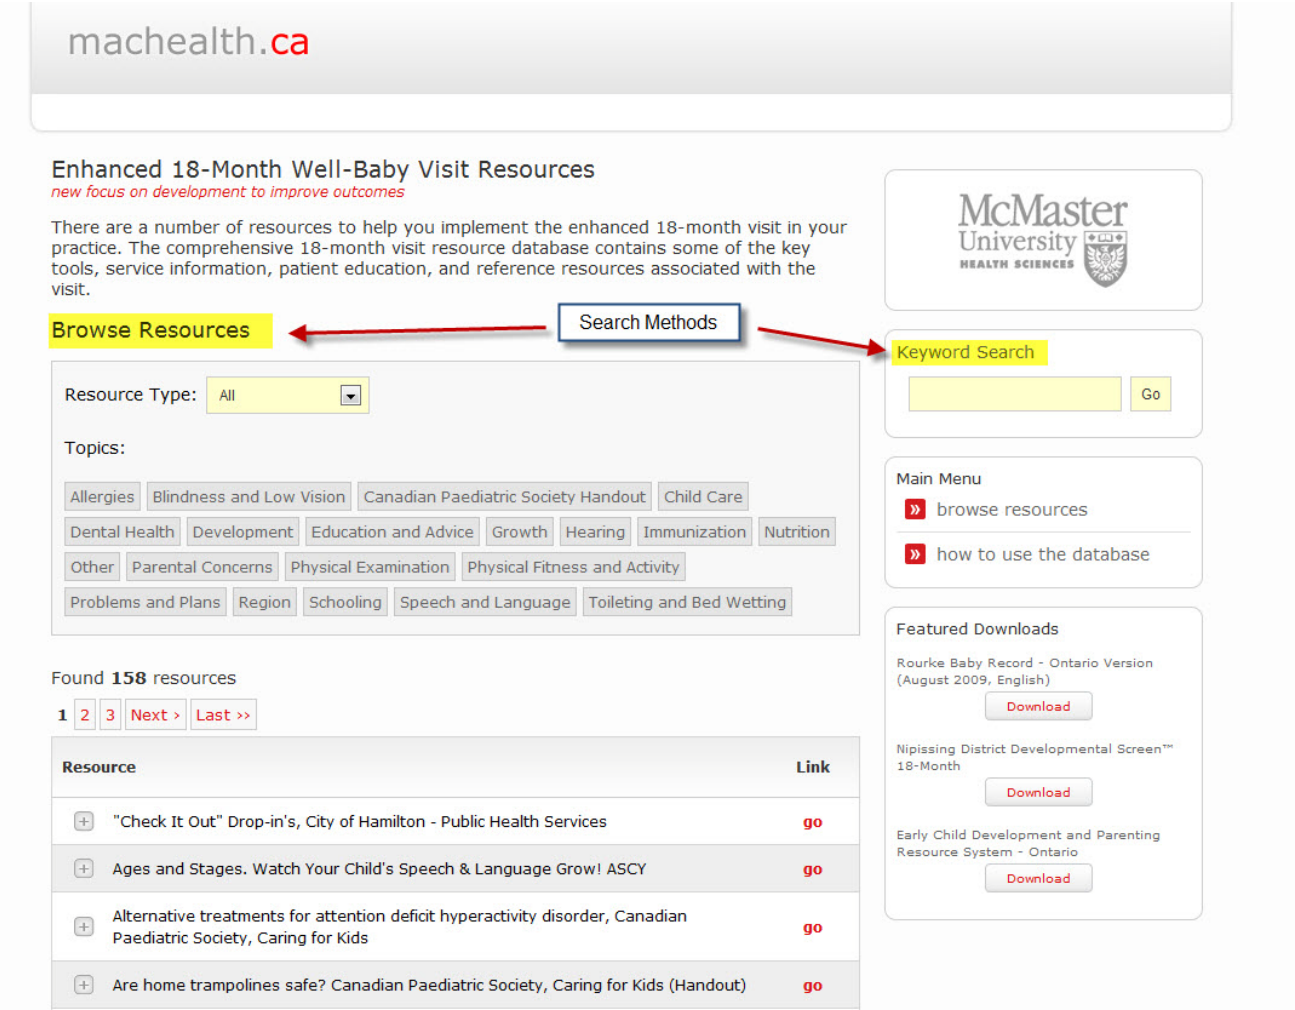
Enhanced 18-Month Well-Baby Visit Resources - Quick Overview

Welcome to the Enhanced 18-Month Well-Baby Visit resource database. This handout serves as an introduction to the database and will provide you with a quick overview of the various ways you can search for resources.

The main database page:



There are two ways to search the database (highlighted above):

1. You can perform a **keyword search** or
2. You can browse resources by **type** and/or by **topic**

These search methods are described in detail below:

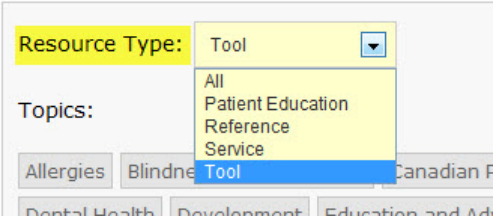
Keyword Search

Enter a **single term** in the keyword search box and click 'go'. The keyword search will search resource titles and descriptions.

Browse Resources

Browsing resources will allow you to focus your search by narrowing your selection to different 'Types' as well as 'Topics'

Resource Type Categories:



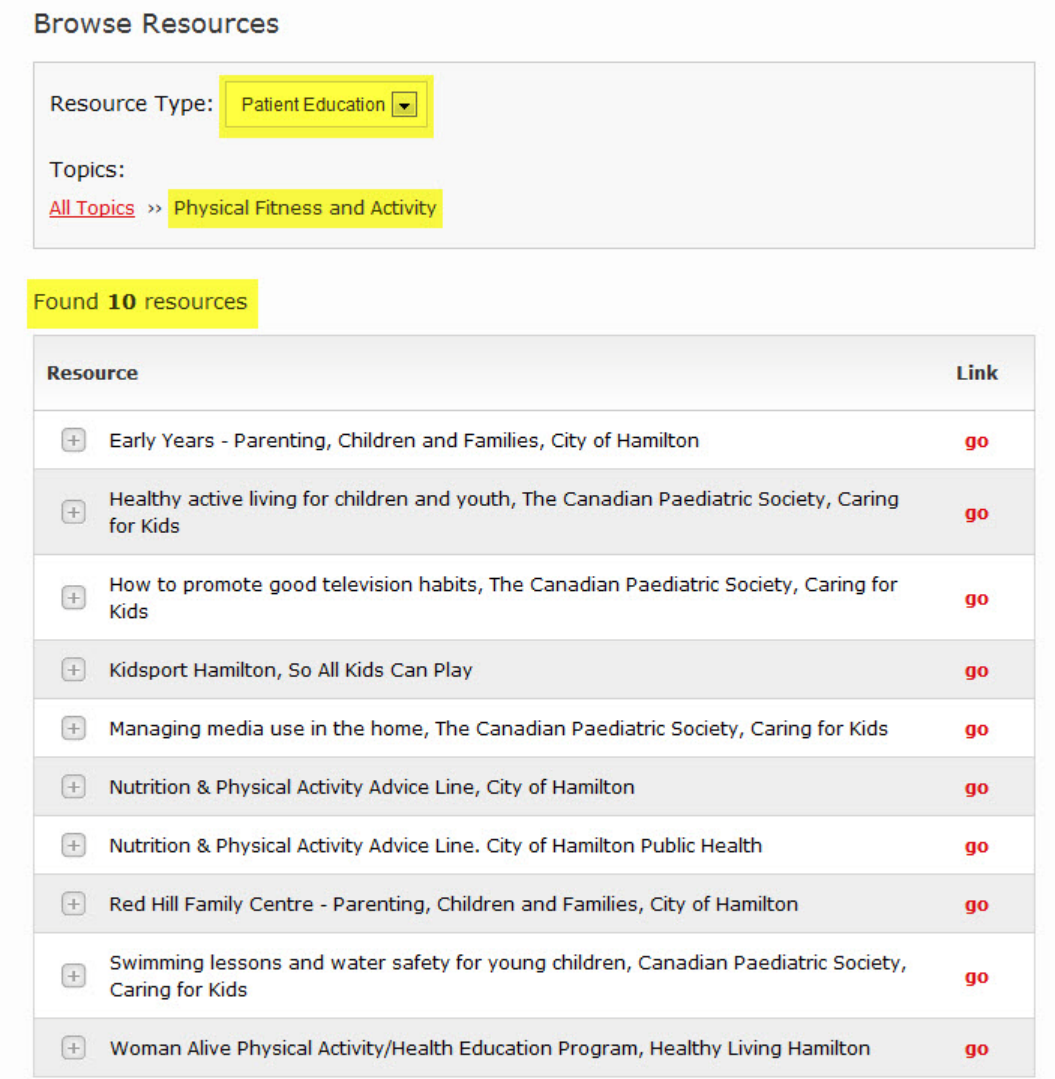
These categories attempt to label each resource by its purpose.

Resource Type	Description
Patient Education	Documents which are usually easy-to-read and concise, that educate the general public about a specific topic. Example: Feeding Your Vegetarian Child
Reference	Resources which contain authorative source data which are used as guides to assist in decision making. Example: Canada's Food Guide
Service	Programs created to assist with early childhood care. Examples: Healthy Babies Healthy Children Program
Tool	Resources that assist practitioners when conducting the 18-Month Well-Baby visit. Examples: Rourke Baby Record

Resource Topic Categories:

These topics are will allow you to quickly focus your search to a particular subject area.

Combining both resource type and topic with allow you to get a snapshot view of resources available in the database. For example: Searching for 'patient education' type resources on the topic of 'physical fitness and activity' returns 10 resources (see image below):



To look at a specific resource click on the sign to view the details of a record. Click on 'go' or the URL to go to the resource.
